

Enterprise Data Curation for Data-Driven Firms

Discover, classify, and prepare unstructured data for management across your DMS, file shares, and collaboration tools so you can reduce risk, control costs, and support AI initiatives with confidence.

Your unstructured data challenges solved

AI Readiness

Create clean and trustworthy datasets for successful AI implementation.

Matter Identification

Connect to your firm's system of record to pinpoint and classify matter content everywhere it lives.

Matter Mobility

Simplify attorney offboarding and M&As by easily locating and governing matter hiding outside your DMS.

Data Cleanup

Locate and compare duplicates against your system of record and remediate ROT to end data sprawl and rapidly clean your data estate.

Data Storage & Migration

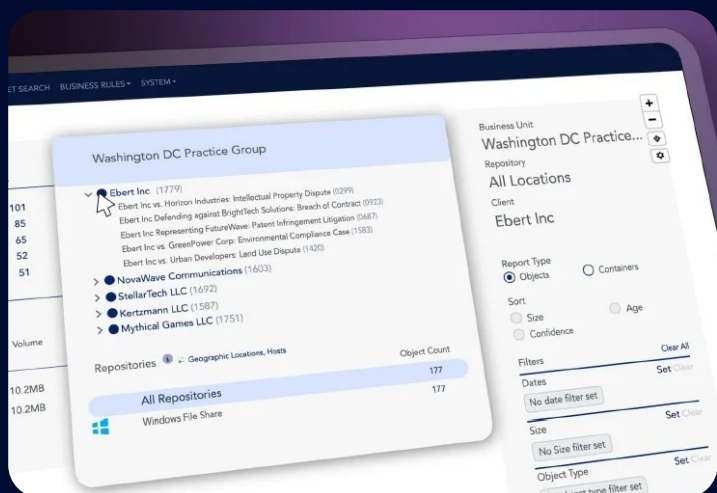

Reduce your firm's data footprint, slash storage costs, eliminate DMS overage charges, and expedite migrations.

Risk Mitigation & Compliance

Find and prepare sensitive data and PII for disposition, enforce retention rules, and satisfy client and regulatory requirements.

Discover what matters

Matter identification

Legal's only data curation platform that connects to your firm's system of record, automatically identifying and classifying hundreds of thousands of matters. Quickly and easily govern matter-related risk and cost across your entire data estate.

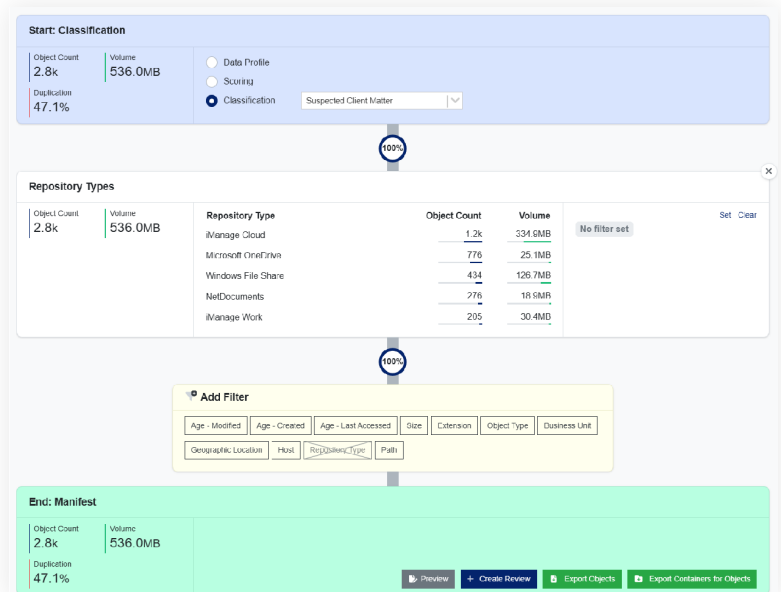

Defensible review workflows

Audit and remediate with confidence. Track every decision, surface policy violations by user or practice group, and generate auditable records—proof for any client or regulator.

A single view of your entire unstructured data estate

Experience an analytics dashboard that surfaces insights on your data. Segment it by age, location, sensitivity, duplication, and business value. Define review sets and workflows and automatically generate documentation enabling defensible decisions.

- **See the whole picture:** Get a consolidated view of your unstructured data across all repositories.
- **Query millions of documents in seconds:** Use a simple interface to quickly report, visualize, and interact with terabytes of data stored in the most common enterprise repositories.
- **Design prioritized review workflows:** Use the Insights Builder to define review sets and move through them in manageable stages.
- **Make defensible decisions:** Generate robust documentation that lets you clearly and repeatably explain and support decisions.

What sets ActiveNav Cloud apart

Purpose-built for legal

Matter-centric visibility and audit-ready reporting to manage risk and prove defensibility.

Matter identification & classification

Connect into your firm's matter data system of record (time, billing, and intake) and classify across hundreds of thousands of matters.

Duplicate comparison

Identify duplicates across unstructured repositories and compare them against your system of record.

Actionable insights

Query and filter hundreds of millions of files to pinpoint and report data stored outside of policy.

Full scalability

Connect to all of your firm's repositories and identify petabytes of content for a unified view of your entire data estate.

Integrates with your systems

Connect seamlessly with your document management system and file shares, including iManage, NetDocuments, OneDrive, Teams, and more.

How it works in your environment

Connect to your repositories

Securely connect to DMS, file shares, collaboration platforms, email, on-prem environments, and other unstructured data sources.

Discover & Classify

Scan millions of documents and organize content by client, matter, sensitivity, age, and repository — with automated classification.

Prioritize & Plan

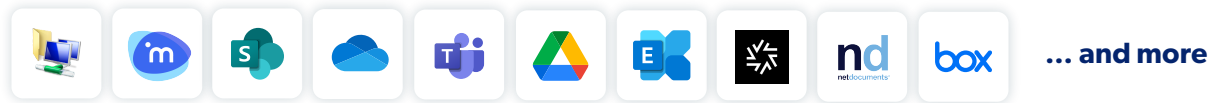

Use dashboards and intelligent prioritization to see where to act first. Integrated scoring shows risk, value, and policy exposure.

Decide & Take Action

Prepare for cleanup, remediation, and policy enforcement with defensible documentation of every action.

Organizations served worldwide

Successfully helping top law firms, corporate legal teams, and other organizations achieve Zero Dark Data

“ Driven by increasing regulatory standards and our stringent data stewardship standards, we partner with our clients to set the highest possible standards for information governance. Our ActiveNav Cloud subscription provides us with insights across our unstructured data estate so that we can monitor data risk, identify and resolve inappropriately stored sensitive data, and address the redundant, obsolete, and trivial. ActiveNav Cloud monitors our file shares, email, OneDrive, and iManage repositories so we can target our resources where they are most needed.

— Jim Merrifield, Chief Data Officer, Robinson+Cole

Ready to take control of your data?

Join leading law firms and corporate legal teams who trust ActiveNav Cloud to discover and classify their unstructured data with confidence. Request a personalized demo and see what curated, AI-ready data looks like at your firm.
